Professional Summary

Electronics and Communication Engineering student with interests in Embedded Systems, IoT, Wireless Communication, Robotics, and Machine Learning. Experienced with ESP32, Arduino, Python, and LoRa-based systems. Interested in developing intelligent communication systems and embedded solutions.

Education

B.Tech in Electronics and Communication Engineering

Government Engineering College, Idukki

Graduation: 2027

Technical Skills

Programming: Python, C, C++

Embedded Systems: Arduino, ESP32, LoRa

Tools: Git/GitHub, Wokwi, PCB Design

Soft Skills: Communication, Problem Solving, Project Management

Projects

Disaster Management Mesh Network using ESP32 and LoRa

- Designed a decentralized emergency communication network.
- Implemented multi-hop routing.
- Developed SOS and location-sharing functionality.
- Improved communication reliability during network outages.

RF-Controlled Buggy Car

- Designed a wireless transmitter-receiver system using Arduino and RA-01H.
- Implemented remote start/stop functionality.
- Tested communication between embedded nodes.

Relevant Coursework

Digital Electronics, Communication Systems, Microprocessors and Microcontrollers, Computer Architecture, Embedded Systems

Areas of Interest

Embedded Systems, IoT, Machine Learning, Robotics, Wireless Communication, Space Technology
